

## **EADP/EADPI Air Duster Plus**

EADP and EADPI are non-flammable products designed for the safe removal of dust and airborne contamination from very delicate or inaccessible areas of electrical and electronic equipment. They are high-powered versions of the standard range; EADP is the high powered version of EAD. For hard to reach areas, EADPI is a high-powered invertible air duster, which is particularly useful for very intricate equipment or items which cannot be moved for cleaning or maintenance.

- Ultra high power, inert, pure compressed gas for dust removal
- High pressure blast for removing stubborn deposits
- High power (EADP) or high power invertible (EADPI) versions available
- Non-flammable propellant

### **Typical Properties**

Colour	Colourless
Flash Point (°C)	None
Boiling Point (°C)	-26.2

<b><u>Description</u></b>	<b><u>Packaging</u></b>	<b><u>Order Code</u></b>	<b><u>Shelf Life</u></b>
<u>High Powered Airduster</u>	400ml Aerosol	EADP400D	48 months
<u>High Powered Invertible Airduster</u>	200ml Aerosol	EADPI200D	48 months

### **Directions for Use**

EADP should be used in a vertical position or at an angle of not greater than 60° to the vertical otherwise a freezing effect will result. If it is necessary to tilt the aerosol more than this, use the invertible version, EADPI.

**Caution:** Do not use EADP/EADPI for prolonged blasts as the surface of the can will form frost.
